

Press release

Basel, July 2019

JAEGGI: Martin Fleischmann becomes new Product Manager

Since the beginning of 2019, Martin Fleischmann has strengthened the Application Engineering Team at JAEGGI in Basel as Product Manager. He will be glad to provide support when it comes to developing special technical solutions, and he assists the Sales Team in dealing with special requests. Furthermore, he is also responsible for JAEGGI's portfolio during the entire life cycle of the products.

Martin Fleischmann holds a university degree in Mechanical Engineering and, following his studies in the field of Energy Engineering, he had first worked as a research associate at the Institute for Refrigeration, Cryogenics and Compressor Technology at TU Dresden. He then became Development Engineer at JAEGGI before moving on to work as Project Manager at ENGIE Refrigeration for five years. At the beginning of January, Martin Fleischmann returned to JAEGGI where he is employed as Product Manager.

About JAEGGI Hybridtechnologie AG

JAEGGI Hybridtechnologie AG, with its headquarters in Basel, is a successful and long-established Swiss company. It is the inventor of the hybrid dry cooler as well as a technology and market leader in hybrid cooling and condensing. Its operations cover engineering, production, sales and service for hybrid dry coolers and condensers. JAEGGI's products are characterised by their excellent reliability, low energy and water consumption and low environmental impact. The company is part of the Güntner Group, an established global manufacturer of components for refrigeration and air conditioning technology and industrial applications.
